SARA AMIT THAKUR

Trainee AI/ML Engineer

sarathakur1003@gmail.com 9216359212 Jaipur, India sarathakur10.github.io/Portfolio

linkedin.com/in/sara-amit-thakur github.com/SaraThakur10

Summary

Aspiring AI/ML Engineer with hands-on experience in machine learning, predictive modeling, and model evaluation. Proficient in Python, Scikit-learn, Pandas, and NLP, with practical experience building classification models and extracting insights from real-world datasets.

Experience

Machine Learning Intern, *Techover Infotech and Productions* 05/2026 – 08/2026

Python Developer Intern, *Blue Eyed Digital Technologies Pvt. Ltd.* 06/2025 – 07/2025

Education

B.Tech, Computer Science & Engineering (Artificial Intelligence), 2023 – 2027
Anand International College of Engineering Jaipur
CGPA: 8.7

Technical Skills

Programming Languages
Python, SQL, C++

Libraries & Frameworks
NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, PyTorch

Machine Learning & Data Science
Classification, Regression, Model Optimization, Feature Engineering, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Scaling, Hyperparameter Tuning, Natural Language Processing (NLP), Supervised and Unsupervised Learning

CS Fundamentals & Tools
Data Structures & Algorithms, OOP, Git, GitHub, Jupyter Notebook

Projects

RootCause AI - Intelligent Production Incident Investigator 10/2026 – Present

- Developing an AI-powered log analysis system using Python, FastAPI, Pandas, and Scikit-learn to identify application errors, detect anomalies, and investigate potential production incidents.
- Building a real-time-style dashboard with React and TypeScript to visualize log metrics, highlight recurring errors, and support data-driven root cause investigation.

Credit Card Fraud Detection 12/2025 – 01/2026

- Developed a fraud detection model using Logistic Regression, achieving ~88–90% precision on 10,000+ transactions.
- Handled class imbalance with sampling techniques to improve recall.
- Evaluated performance using precision, recall, and F1-score.
- Impact: built an efficient fraud detection system to support transaction security.

Tools: Python, Pandas, NumPy, Scikit-learn

Research / Publications

Evolving Cybersecurity Challenges and Future Frameworks for Secure Data Transmission, 01/12/2024
International Journal of Creative Research Thoughts (IJCRT)
Explored emerging technologies and strategies to enhance data protection and system security.
